PROFILE

Full Stack Developer with expertise in developing and implementing web and Mobile applications and solutions using a variety of technologies and programming languages. Seeking to leverage my transferable skills, including my ability to learn quickly and adapt to new technologies, in a challenging Full Stack Developer role.

SKILLS

Python	C#	MongoDB	HTML5	TailwindCSS
Django	Node.js	MySQL	CSS	Git
Javascript	Express.js	React Native	React	Glthub

WORK EXPERIENCE

Full Stack Developer

Remote freelancer

- Collaborated on the development of a civil engineering application, leveraging my expertise in Django to create a robust and efficient software solution.
- Worked closely with a team of engineers and designers to understand project requirements and translate them into functional features and components.
- Designed and implemented the backend architecture of the application using Django, ensuring scalability, data integrity, and optimized performance.
- Utilized Django's powerful features, including ORM (Object-Relational Mapping) and authentication, to develop secure and user-friendly functionalities.
- Integrated various third-party libraries and APIs into the application, enhancing its capabilities and providing seamless user experiences.
- Implemented efficient database models and queries to handle complex data structures associated with civil engineering projects.
- Actively participated in code reviews and provided constructive feedback to maintain high coding standards and improve the overall quality of the application.
- Stayed up-to-date with the latest advancements in Django and related technologies, continually enhancing my skills to deliver cutting-edge solutions.
